## ABOUT COFFEE REAL

The business of Coffee Real is to source and select the best Arabica coffee beans in the world and then hand roast them to inspiring standards of perfection, so that when brewed at home or by a Master Barista the coffee will hold its integrity and uniqueness in the cup.

We would describe ourselves as a small family run 'artisan' coffee roastery specialising in top quality single estate and single origin Arabica coffee.

Unlike large coffee roasters, our coffee is roasted to order in small batches, this not only allows us to roast and ship the same day (at the peak of freshness) but also keeps our roasting process intimate and hands-on.

It is also good to note that we know our beans - meaning we roast every single bean we sell - in contrast to some roasters and coffee bean suppliers who use the services of large commercial roasters.

The name 'Coffee REAL' embodies the way in which we run our business:

**Real** Coffee prepared in a traditional and authentic (artisan) way, rather than being mass-produced, thus preserving the coffee's integrity and ultimately delivering its full awe-inspiring potential.

**Real** Coffee that is fairly and ethically traded through our own [RealTrade](#) - based on fact, firsthand observation and experience, and not on a brand, logo or hype.
